(c) whether it is also a fact that every minute one child dies in the country due to diarrhoea which can be easily prevented by a simple solution of ORS; and

(d) if so, the steps being taken to ensure the reach-out of ORS packets to every child in need ?

THE MINISTER OF STATE IN THE MINISTRY OF HEALTH AND FAMILY WELFARE (SHRI A. RAJA): (a) and (b): The National Family Health Survey (NFHS) (1998-99) reported that 27 per cent children under the age of three years with a recent bout of diarrhoea were given ORS. The proportion of children receiving ORS in 1992-93 by NFHS was reported to be 18 per cent. Reasons for relatively low use of ORS include low prescription rate of ORS by physicians in preference to use of anti-diarrhoeals and antibiotics and inadquate awareness and acceptance of ORS by the community.

(c) ORS solution is used to prevent and treat dehydration in cases of diarrhoea. At current rates of child mortality, it is estimated that annually 2.4 lakh child deaths can be attributed to diarrhoea. This averages to one death every 2.2 minutes.

(d) Under the Reproductive and Child Health Programme 300 ORS packets are supplied to all sub-centres every year as a part of drug kit A. Medical and paramedical staff are being reoriented and trained to use ORS in children with diarrhoea. Use of ORS by the community is being popularized through Information, Education and Communication programmes.

Assistance given by HSCC

† 3690. SHRI RAM JETHMALANI : Will the Minister of HEALTH AND FAMILY WELFARE be pleased to state:

(a) whether Hospital Services Consultancy Corporation provides assistance for construction of hospitals in the country;
